BASIC EDUCATION STATISTICAL BOOKLET

Table of Contents

Table of Contents	i
List of Tables	iii
List of Figures	vi
Abbreviations	vii
Foreword	ix
Preface	x
Acknowledgements	xi
Executive Summary	xii
CHAPTER ONE: BACKGROUND INFORMATION	1
Introduction	1
Overview of the Ministry of Education Science and Technology	1
Vision	1
Mission	1
Core Values	1
Organization of the Ministry	2
CHAPTER TWO: METHODOLOGY	3
Introduction	3
Validation of Schools List	3
Review of Data Collection Tools	3
Data Collection and Processing	3
Validation of Results	4
Limitations of the Data	4
Estimation for Non Response	4
CHAPTER THREE: HIGHLIGHTS OF 2014 SCHOOLS CENSUS RESULTS	5
Introduction	5
Number of Schools	5
Enrolment by Gender and Level of Education	7
Special Needs Learners and Orphans and Vulnerable Children	9
Basic Education Cycle Schooling Profile	10
Gross Enrolment and Net Enrolment Rates	12
Internal Efficiency Indicators	19
Pupils/Students Teacher Ratios	19
Schools Infrastructure	23
National Examinations Results	26
CHAPTER FOUR: CONCLUSION AND RECOMMENDATIONS	28
Conclusion	28
Recommendations	29

ANNEXES	30
ANNEX I: DEFINITION OF INDICATORS	30
ANNEX II: EARLY CHILDHOOD DEVELOPMENT AND EDUCATION	31
ANNEX III: PRIMARY EDUCATION	38
ANNEX IV: SECONDARY EDUCATION	78
ANNEX V: WORKING GROUPS	103

List of Tables

Table 1: Number of Schools and Enrolments, Actual and Adjusted Figures (2014)	4

TVET	Technical, Vocational Education and Training
TVETA	Technical, Vocational Education and Training Authority
UIS	UNESCO Institute for Statistics
UNESCO	United Nations Education, Scientific and Cultural Organization
UNICEF	United Nations Children's Fund
YP	Youth Polytechnic

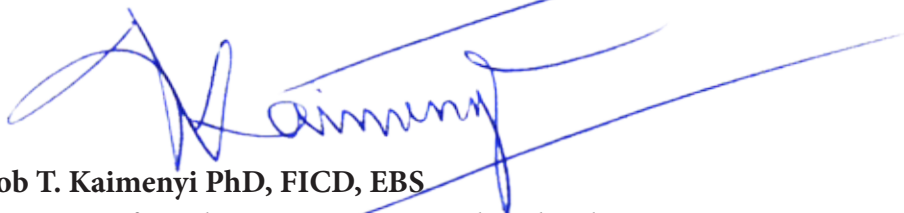

Foreword

Data and information is critical in bringing out issues and forms part of the strategic, tactical and operational resource distribution. It gives managers an opportunity to strengthen gains realized and provide remedy to areas of weaknesses it highlights. In this breath, education statistics should present facts to help improve the sector's performance. This can only be possible if the statistics for the sector are timely, accurately and reliably delivered to intended users.

The Ministry of Education, Science and Technology and other stakeholders in the sector are committed to the provision and utilization of timely, accurate and reliable education data and information. This is made possible through a data management framework that contributes towards improving policy formulation; planning; budgeting; decision making; and program interventions. This will enhance the general performance of the sector and provide an opportunity to address the progress made towards achieving the development objectives of the education sector as stipulated in the strategic objectives in the Medium Term Plan 2013–2017; the National Education Sector Plan and the Strategic Plan 2013–2018; the national development strategies in the Vision 2030; and the Constitution of Kenya 2010.

In the past couple of years the Ministry has made several attempts at developing a comprehensive Education Management Information System (EMIS) to deliver timely and reliable education data in support of education planning and management. The attempts have faced a number of challenges which compromised the delivery of timely education statistics. In 2014 the Ministry engaged development partners to help address some of the challenges and deliver the 2014 education statistics. Arising from the support, the Ministry carried out a schools census whose results are presented in this booklet. The Ministry has also established a solid foundation that will facilitate delivery of future education statistics.

I would like to assure all education stakeholders that the Ministry is committed to institutionalizing annual data collection culture so that progress on education programs is regularly measured and reported. This will provide a source of useful data and information for planning and policy making in the sector. I wish to therefore call for your continued support and participation to ensure the realization of the sector's development.

Prof. Jacob T. Kaimenyi PhD, FICD, EBS
Cabinet Secretary for Education, Science and Technology

Preface

This Education Statistical Booklet is primarily based on the 2014 school census data that was collected from basic education institutions namely Early Childhood Development and Education (ECDE), Primary and Secondary. Additional data and information has been generated from existing databases from 2009 to 2012 school censuses.

In an effort to increase the reporting rate by schools, the Ministry successfully reviewed its data collection tool. The initial data collection tool was a seventeen page questionnaire which often resulted in under reporting coupled with blank sections. The EMIS team worked out a tool that would collect information that was sufficient for education sector planning based on feedback from the sector stakeholders. The reviewed data collection tool was successfully administered to each of the three levels: ECDE, Primary and Secondary.

As you are all aware, the Free Primary Education and the Free Day Secondary Education which began in 2003 and 2008 respectively have seen a huge growth in the enrolment for the school going children. Mainstreaming of Early Childhood Development and education also continues to show impressive progress. The effective and successful implementation of these important programs among others is dependent on timely, accurate and reliable data from learning institutions at these levels.

The 2014 Education Statistical Booklet provides an insight into the education sector status for the period and gives data and information on all the basic education levels. A number of critical issues in the sector have been presented including: number of institutions, enrolments, schooling profile, internal efficiency, pupil teacher ratios, school infrastructure, and examination performance among others.

This report therefore generates very useful information that will be used by planners, policy makers, educators, parents, the learners, researchers as well as our development partners.

Dr. Belio R. Kipsang
Principal Secretary,
State Department of Education

Acknowledgements

I would like to thank everyone who made this publication a reality. I would like to thank the UNICEF for its strategic partnership with the Ministry through the technical and financial assistance which have reengineered statistical processes in the education sector. The team led by Daniel Baheta has been incredibly helpful and I would like to encourage more of such partnerships within the sector. I am thankful for the overall technical guidance of Ramahatra Andriamamy Rakotomalala in economics of education, education statistics and population fields to the Ministry team. I would also like to convey my special appreciation to the UNESCO Institute for Statistics (UIS) for the technical support in developing and customizing the StatEduc application that was used in processing data presented in this booklet.

I would like to commend the commitment and the dedication of the Central Planning and Project Monitoring Unit of the Ministry under the leadership of the Chief Economist, State Department of Education in the delivery of this publication. In deed the Ministry has affirmed its capacity to respond to the demand for education data in the country. The contribution of the County Directors of Education from all the forty seven counties; Sub County Directors; Quality Assurance and Standards Officers; District EMIS clerks; and teachers from all over the country cannot be overemphasized. This team's conscious and timely actions helped in delivering the 2014 schools census results in record time.

The collaboration of the Kenya National Bureau of Statistics (KNBS) in this process as the institution responsible for the National Statistical System will not escape my acknowledgement. Last but not least I would like to pay a special tribute to the Postal Corporation of Kenya (PCK) for making the distribution of questionnaires all over the country very easy. The logistics of distribution of questionnaires has remained a nightmare to the Ministry but thanks to the PCK, there is a bright future to that process.

Leah K. Rotich (MRS.), MBS
Ag. Education Secretary,
State Department of Education

Executive Summary

The 2014 Education Statistical booklet has been developed as a fulfilment of the Ministry's function to deliver timely, accurate and reliable data. The booklet largely covers Early Childhood Development and Education (ECDE), primary and secondary schools. This is based on the 2014 schools census which was conducted in basic education institutions. The booklet is organized in four key chapters.

Chapter one gives the background and overview of the Ministry of Education, Science and Technology. The chapter presents the Vision, Mission and core values of the Ministry as well as its role in promoting and coordinating quality education. The chapter introduces the organization of the Ministry in terms of its directorates and the Semi-Autonomous Government Agencies (SAGA) under the Ministry which fulfils some of the specialized roles attributed to the Ministry.

Chapter two presents the methodology employed in conducting the 2014 schools census. It highlights the process that delivered the results including validation of schools list; review of the data collection tools; testing the reviewed tools; conducting the schools census; the processing and validation of the collected data. The chapter also presents the limitations of the data

Chapter three presents the highlights of the results of the 2014 schools census detailing the validity of the results. The chapter presents the trend of education indicators with the base year being 2009. The details of the chapter include the number of schools and school sizes; enrolments and enrolment rates; schooling profile; internal efficiency measures; teachers and pupil teacher ratios; text books and pupil text book ratios; classrooms and class sizes; and examination results. The chapter also gives cross county variations of selected indicators revealing the unequal phenomena that may be hidden behind national averages.

Chapter four presents recommendations and way forward in the institutionalization of data management within the sector. Having faced a myriad of challenges in the past that undermined the delivery of consistent statistics, the Ministry has established a foundation that will ensure delivery of future statistics. The resultant framework should ensure that reported statistics will be reliable, timely and accurate.

Finally, the annexes provide comprehensive information of measures and indicators aggregated at county level. These are necessary for education sector planning and monitoring.

CHAPTER ONE: BACKGROUND INFORMATION

Introduction

The goal of the Vision 2030 is to transform the country into a globally competitive and a prosperous nation by the year 2030. The vision is founded on the social, economic and political pillars. Within the social pillar, education sector plays a critical role in facilitating the process of inculcating knowledge, attitudes and skills necessary for catapulting Kenya to a globally competitive country and acquiring new knowledge in a systematic way with a view to improving products and processes. The sector therefore has a major responsibility of facilitating the process of developing manpower necessary for transforming Kenya into a globally competitive country.

Overview of the Ministry of Education Science and Technology

The Ministry of Education, Science and Technology, in the current government structure was established through the Executive Order No 2 of May 2013. The order mandated the Ministry to among other functions, manage education and training matters in the country.

Vision

The vision of the Ministry is to have *a globally competitive education, training, research and innovation system for sustainable development.*

Mission

To provide, promote and coordinate the delivery of quality education, training and research and enhance integration of Science, Technology and Innovation into national production systems for sustainable development.

Core Values

The operational environment is governed by a desired set of core values, which constitute the desired organizational culture. The core values of the Ministry include:

1. **Integrity** – Committed to acting in an honest, accountable and transparent manner in all our undertakings.
2. **Professionalism** – Committed to the highest levels of achievement obtainable through competencies and critical skills.
3. **Teamwork** - Embrace teamwork and collaboration both within the Ministry and with all partners in the provision of education services.
4. **Excellence** - Committed to world class benchmarking of standards
5. **Efficiency**- Strive to achieve the highest value of benefit from the deployment of resources, particularly to the learner.
6. **Innovativeness and creativity** – Committed to setting and maintaining high standards of education and training through continuous improvement of service delivery.
7. **Upholding cultural diversity** – Education seeks to create a cohesive society where all people live together harmoniously regardless of race, tribe, creed, or geographic area of origin.

Organization of the Ministry

The Ministry is comprised of the following directorates:

1. **Administration and Planning:** The directorate provides shared services to technical directorates. The directorate is further arranged in various units that include Administration, Human Resource Management and Development, Accounts, Finance, Central Planning and Project Monitoring Unit (CPPMU), Information and Communication Technology; Procurement; HIV/AIDS Unit; Gender; and Guidance and Counseling.
2. **Directorate of Basic Education:** The directorate is responsible for the formulation of pre-primary education policies; implementation of primary education; primary schools teachers training; and Primary Special Needs Education.
3. **Directorate of Secondary and Tertiary Education:** The directorate co-ordinates secondary education programs as well as pre-service training for diploma secondary school teachers.
4. **Directorate of Policy, Partnerships and East Africa Community Affairs:** The directorate coordinates overall policy formulation and nurturing partnerships between the Ministry and its development partners within the country and beyond.
5. **Directorate of Alternative Provision of Basic Education and Training:** The directorate coordinates Adult and Continuing Education programs; provides basic education and training opportunities to adults and out of school youth aged 15 years and above who either missed to join the formal education system in their childhood or dropped out of school before attaining sustainable levels of education.
6. **Directorate of Youth Training:** The directorate is mandated to revitalize and rehabilitate Youth Polytechnics countrywide. This directorate addresses issues of youth with regard to access of relevant education and training, employment and participation in national development.
7. **Directorate of Technical Vocational Education and Training (TVET):** The directorate is mandated to coordinate and implement technical education and training in the country. This includes enhancing access, equity, quality and relevance in technical education and training. The directorate also fosters linkages and collaborations between industry and TVET institutions.
8. **Directorate of Higher Education:** The directorate collaborates with relevant bodies to formulate and review of policies on Higher Education; expand access and improve quality and relevance of university education; coordinate admission of students to public universities.
9. **Directorate of Research Management and Development:** The mandate of the directorate includes: formulation of policy for research, science, Technology and Innovation; knowledge management; facilitating and guiding the national research system through policies that rationalize the integration of research and development into overall national economic development; and integrating research into national development.

In addition to the directorates, the Ministry has other key sector players which include The Teachers Service Commission (TSC); Semi Autonomous Government Agencies (SAGA); Unions; Civil Societies; and the Kenya Private Schools Association.

CHAPTER TWO: METHODOLOGY

Introduction

Data and information in any sector is essential in bringing out the issues within that sector. It gives sector managers an opportunity to strengthen depicted gains and provide remedy to areas of weakness. Education statistics should present facts to help improve the sector's performance. This is only possible if the statistics are timely, accurate and reliable. Flowing from this, all stakeholders in the sector have an increased chance of working on the same goals and objectives. The 2014 schools census was carried out through a series of activities as detailed below.

Validation of Schools List

In order to conduct an effective schools census, a valid schools list was found to be very necessary. The EMIS team examined all existing databases in the sector and from them established a working master list of primary and secondary schools. The team manually went through each of the resultant schools removing all possible duplicates. After the first phase of clean-up, the team sent respective sub county lists to each of the sub counties for validation. In validating the lists, Sub County Directors confirmed the existence of schools and their operational status (functional or closed down) as well as adding missing schools.

Review of Data Collection Tools

The Ministry felt a critical need for conducting a Rapid Results Initiative (RRI) on EMIS. To accomplish this, there was need to review existing seventeen page questionnaire to a more effective data collection tool in effort to increase response rate by schools. The Ministry therefore developed a one page questionnaire taking into account the critical education variables for planning and monitoring purposes. The review was done on the ECDE, primary and Secondary questionnaires.

The developed tools were subjected to internal appraisal before piloting in 72 schools (41 ECDE/ Primary and 31 Secondary) drawn from Kajiado, Kiambu and Nairobi counties. The questionnaires were distributed to pilot schools and collected within three days. The response was impressive as 99% of the schools responded to all the fields captured in the questionnaire. After piloting, the data collection tools were finalized taking into account feedback from pilot schools.

Data Collection and Processing

The questionnaires were printed and distributed to basic education institutions all over the country. The Sub County Directors of Education took charge of the data collection process during the month of November 2014 and subsequently submitted all the questionnaires to the Ministry in the first week of December 2014.

The data entry exercise for the 2014 schools census took place in January 2015 at the Kenya Education Management Institute (KEMI). The Ministry invited 100 clerks from the counties to support the national EMIS team in the data entry. The Ministry used the StatEduc application for data entry. StatEduc is an application developed by UNESCO and was customized to conform to the questionnaires used for the 2014 schools census.

Validation of Results

Since the tool used in data collection was a self-administered questionnaire, the Ministry carried out checks in about 500 sampled schools to verify that the data provided by schools was accurate. The Ministry dispatched nine teams to visit sampled schools across the country. The validation exercise revealed that the data reported in the schools census exercise was consistent with existing school records and the physical facilities observed.

Limitations of the Data

The results from the 2014 schools census were faced with non response from some schools. The stand-alone ECDE centers lead the non-response. The response for primary and secondary schools was 96.5%. This is based on the validated lists of primary and secondary schools. An additional limitation to the results presented in chapter three is the assumption that there is no inter-county migration of school going age children.

Estimation for Non Response

Table 1 presents the numbers obtained from the 2014 schools census. It also indicates the adjusted numbers estimated to 100%. It is evident from this table that there is a huge variation in the ECDE level than in primary and secondary school levels. This is due to the non-response of the stand-alone ECDE centers.

At the ECDE level, it was challenging to get a master list due to time factor. The major control available was the number of centres established from the 2007 school mapping exercise and subsequent projections over the years yields an estimate of 40,211 in 2014. As a result the ECDE enrolment is estimated to 3.019 M based on the center sizes established from the 28,477 centers recorded. The primary and secondary figures have been adjusted from a response rate of 96.5% to 100%.

Table 1: Number of Schools and Enrolments, Actual and Adjusted Figures (2014)

	ECDE	Primary	Secondary
Actual from Census			
Schools	28,477	28,362	8,625
Enrolment	2,440,443	9,559,072	2,310,066
Adjusted to 100%			
Schools	40,211	29,460	8,734
Enrolment	3,019,866	9,950,746	2,331,697

Source: Ministry of Education, Science and Technology

CHAPTER THREE: HIGHLIGHTS OF 2014 SCHOOLS CENSUS RESULTS

Introduction

This chapter provides key highlights of selected indicators from 2009 to 2014. The rationale for the selection of the two point years was the in-depth enumeration of persons in 2009 and the comprehensive enumeration of schools in 2014. The two years thus give accurate status of education in the country. The highlights of the results cover number of schools; enrolments; teachers; access and coverage; schooling profile; efficiency indicators, students' flow indicators; examinations performance; and infrastructure.

Number of Schools

Table 2 below indicates the trend of the number of schools. The number of Early Childhood Development and Education Centers increased from 38,247 in 2009 to 40,211 in 2014, representing an annual growth of 1%. Public centers increased at a slightly lower rate of 0.8% compared to private centers that grew at 1.4%. The share of private ECDE centers remained consistent at 38% throughout the same period while the average size of an ECDE center increased from 59 to 75. The increase could be attributed to ECDE mainstreaming drive by the Ministry.

Table 2: Number of Schools

Level of Education	2009	2010	2011	2012	2013	2014
ECDE						
Public	23,823	23,980	24,588	24,654	24,702	24,768
Private	14,424	14,543	14,912	15,104	15,443	15,443
Total	38,247	38,523	39,500	39,758	40,145	40,211
Average school size	59	62	65	68	71	75

Public Diploma		2	2	2	2	2
Total		112	114	120	125	127

Source: Ministry of Education, Science and Technology

At primary level, the numbers of schools grew at an annual rate of 5.1% between 2009 and 2014. The growth registered by private schools was much higher than that of public schools at 12% and 3.2% respectively. In terms of proportion, private schools increased from 19% in 2009 to 26% in 2014. The average school size at primary level significantly dropped by 63 over the same period and this could be explained by the increase in the number of schools which have come to ease pressure on existing schools.

Secondary schools registered the highest annual growth of the three levels of education. The number of schools grew at 8.2% between 2009 and 2014. Public secondary schools grew at 8.9% annually while private schools grew at 3.9% during the same period. The share of private schools dropped from 15% in 2009 to 12% in 2014 and this is attributed to the faster growth of public secondary schools compared to the private. The average size of a secondary schools increased from 250 in 2009 to 283 in 2011 before decreasing to 264 in 2014.

Figure 1: Number of Schools

Enrolment by Gender and Level of Education

Table 3 below shows the trend in enrolments across the three levels of basic education. The ECDE level has witnessed tremendous growth between 2009 and 2014, registering an annual growth of 6.1%. The growth may be attributed to assured transition between ECDE and primary schools as most ECDE centers are hosted in primary schools. The absolute parity index has improved in favor of girls from 2009 to 2014. The national average for the parity index has hidden cross county variations which have been presented in chapter four.

Enrolment in ECDE increased by 772,600 pupils over the period between 2009 and 2014 this giving an annual growth rate of 6.1%. The total number of pupils enrolled in Primary Education increased by more than 8% over the period, with about 767,200 additional pupils and an annual growth rate of 1.6%. Secondary Education had the highest increase over the period with about 837,300 additional students that represent almost 57% increase over the period and with 9.4% annual increase.

The parity index between girls and boys at ECDE level, increased over the period from 0.95 in 2009 to 1.05 in 2014. Thus there were more boys than girls at the beginning of the period and this changed to having more girls than boys in 2014. In Primary Education, the parity index improved over the period but did not get to parity by 2014 and hence equality is not yet achieved. Despite a real improvement in the gender parity at Secondary Education over the period, the index is still low at 0.92. Thus there are fewer girls than boys at Secondary Education level.

Table 3: Enrolment by Gender ('000) and Gender Parity Index

Level of Education	2009	2010	2011	2012	2013	2014
ECDE						
Boys	1,151.0	1,216.1	1,281.2	1,346.2	1,411.3	1,476.4
Girls	1,096.3	1,185.7	1,275.2	1,364.6	1,454.0	1,543.5
Total	2,247.3	2,401.8	2,556.3	2,710.8	2,865.3	3,019.9

Table 4 shows evolution of student by education level within the education system, from ECDE to the end of Secondary education over the period of 2009 to 2014. More detailed analysis will be provided later in this section on student flow and schooling profile analysis.

Table 4: Enrolment by Education Levels, in thousands

	Boys						Girls						Total					
	2009	2010	2011	2012	2013	2014	2009	2010	2011	2012	2013	2014	2009	2010	2011	2012	2013	2014

Special Needs Learners and Orphans and Vulnerable Children

As indicated in table 5, the number of special needs learners was 251, 542 while the number of OVCs was 1,083,472 in 2014. In public primary schools, about 3% of the learners are pupils with special needs while about 12% are OVCs. In public secondary the proportions are lower 0.2% and about 3% respectively. Majority of the special needs and OVCs are in public schools both at primary and secondary level.

Table 5: Special Needs, Orphaned and Vulnerable Children

	Special Needs Learners	OVCs
Primary		
Public	243,081	996,037
Private	8,461	87,435
Total	251,542	1,083,472
<i>Percentage</i>		
Public	2.9%	11.9%
Private	0.7%	7.3%
Total	2.6%	11.3%
Secondary		
Public	12,694	245,658
Private	1,404	14,881
Total	14,098	260,539
<i>Percentage</i>		
Public	0.2%	2.9%
Private	0.1%	1.2%
Total	0.1%	2.7%

From table 6 below, the overall enrolment in public primary teacher training colleges grew by 19.5% over the period with an annual growth of 4.9%. In private primary TTCs, there was tremendous growth in enrolment by over 88% during the same period and an annual growth of 22%. In diploma teacher training, there was a growth in enrolment of 66.8% during the period. There were more females enrolling in primary teacher training than males while at diploma level, the number of males were slightly more than their female counterparts.

Table 6: Enrolment in Teacher Training Colleges

INSTITUTION	Male					Female				
	2010	2011	2012	2013	2014	2010	2011	2012	2013	2014

Basic Education Cycle Schooling Profile

Schooling profiles provide comprehensive information on evolution of enrolments as opposed to cycle averages measured by Gross Enrolment Rates. A schooling profile enables visualization of access and completion rates in a given cycle. Through the schooling profile, one is able to tell the retention rate in a cycle. This helps in understanding how pupils/students are moving within the cycle.

Table 7 below presents main schooling profile indicators between 2009 and 2014. As shown in the table, access at grade one moved from 112.7% to 102.1% in 2009 and 2014 respectively. Access rates that exceed 100% indicate that more than one generation is entering the standard one at the same time. This is attributed to a catch up system (multiple cohort entry). The drop from 112.7% to 102.1% can be attributed to the end of the catch up phenomenon.

Access at grade six (retention) has improved over the years from 95% in 2009 to 100.2% in 2014 (EFA target). The enrolment at class eight has grown over the same period at an annual rate of 0.6%. However, this rate of growth in the enrolment is lower than the annual growth of the population that is theoretically supposed to be in class 8 (Age 13) over the same period hence the significant drop in the primary completion rate from 86.5% in 2009 to 79.3% in 2014.

Under the Education for All Framework, the desire of all countries that ratified the commitment is to attain universal primary education, i.e. all children of school going age to enrol in school and complete the primary cycle as designed. In Kenya there is universal access but after grade six, the system loses children along the way thereby undermining the attainment of universal primary education.

Table 7: Schooling Profile Indicators

	2009	2010	2011	2012	2013	2014
Primary						
Access Std1	112.7%	109.7%	107.8%	105.8%	104.3%	102.1%
Access Std6 (EFA target)	95.0%	93.0%	97.8%	97.2%	102.2%	100.2%
Access Std8 (Primary completion)	86.5%	84.8%	83.3%	81.7%	80.0%	79.3%
Transition Primary to Secondary						
Promotion rate Std8 to Form1	57.0%	59.2%	60.1%	69.5%	75.0%	N/A
Transition rate Primary to Secondary	55.0%	61.0%	63.5%	64.5%	74.7%	79.6%
Secondary						
Access Form1	48%	52%	53%	53%	60%	63%
Access Form4	40%	36%	43%	46%	49%	48%
Retention						
In Primary Std1 to Std6	84.3%	84.8%	90.8%	91.9%	98.0%	98.1%
In Primary Std1 to Std8	76.8%	77.3%	77.3%	77.2%	76.6%	77.7%
In Secondary Form1 to Form4	85.2%	70.3%	80.4%	86.9%	81.7%	76.4%

Source: Ministry of Education, Science and Technology

Promotion rate is given by the number of new learners in a particular grade relative to the number of learners in the preceding grade during the previous year. Transition rate is the probability a learner in a particular grade will be in the next grade in the succeeding year. For instance transition to Form1 is the likelihood for learners in Std 8 reaching Form1.

The schooling profile shown in figure 2 below shows the overall advancement of students within the education system from standard one to form four and also the change in schooling profile between 2009 and 2014. The graph indicates improvement from the 2009 cross sectional comparison with 2014. The access at grade one has moved closer to universal access over the period. This is an indication that there has been an increased tendency to join school at the right age over the years. Retention to grade six has reached the target that was envisioned under the Dakar Framework of Education for All. Primary to secondary transition has improved and access to secondary is has equally increased.

Figure 2: Schooling Profile I

The graph in figure 3 below is similar to the previous one in figure 2 but shows the values of key access point within the education system. As already discussed earlier in the document, access to standard 1 improved from 113% to 102% due to the end of multiple cohort entry during catch-up phase.

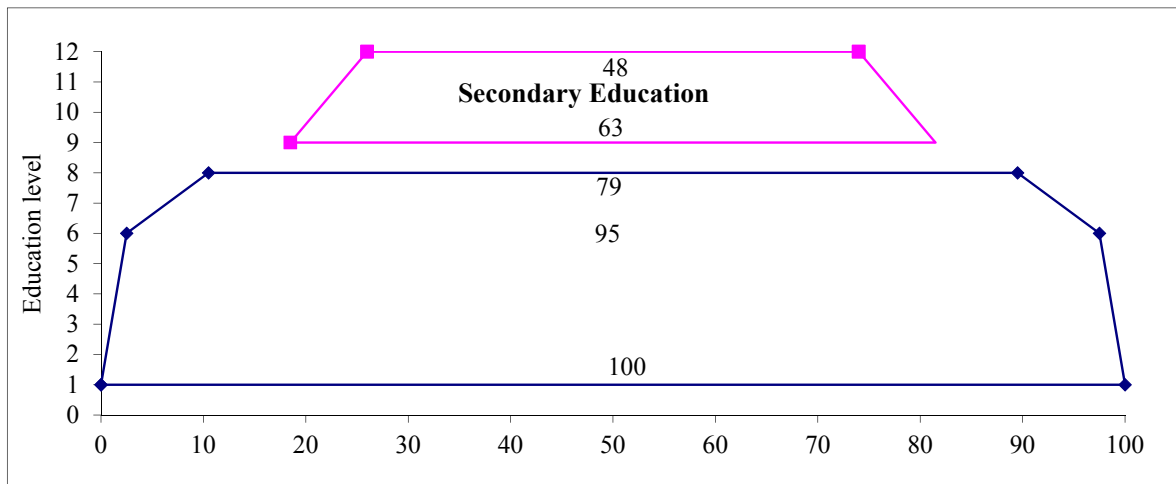

Figure 3: Schooling Profile II

Access rate to standard 6 reached the EFA objective¹. Access to standard eight is the proxy for primary completion in Kenya and decreased by about nine percentage points. The reason is that the number of learners in class eight increased less than the population ages 13 who are theoretically supposed to be at that class.

1 EFA Primary Grade 6 completion

Figure 4: Schooling Pyramid

The graph provides an overview of the volume in levels of education and also presents the main parameters at different key points of the country's basic education system. In terms of volume, ECDE, Primary and Secondary education represent 20%, 65% and 15% respectively of the system.

Gross Enrolment and Net Enrolment Rates

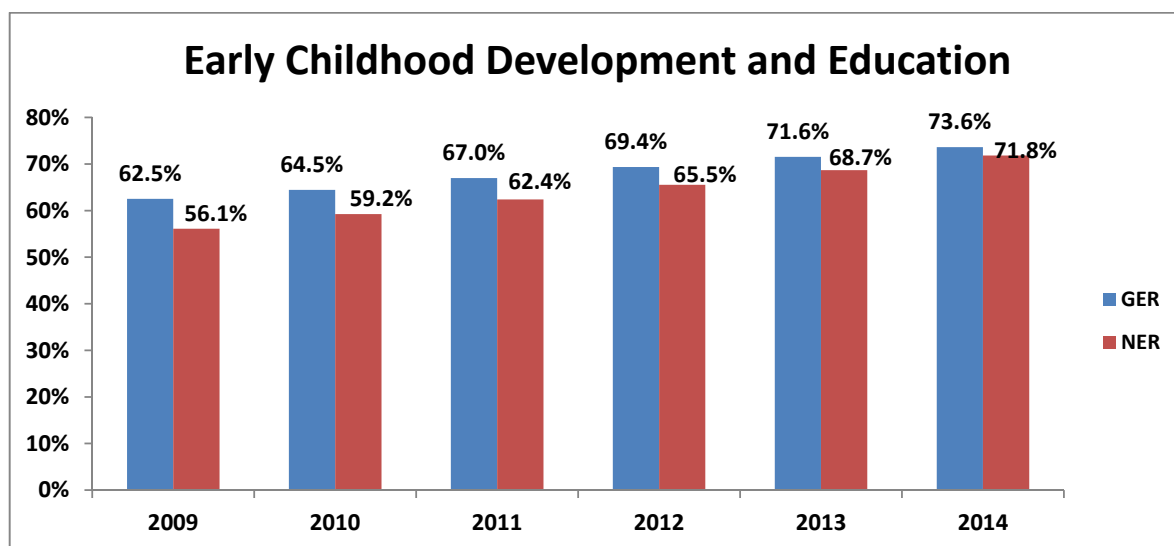

Early Childhood Development and Education

The GER and NER for ECDE have improved significantly between 2009 and 2014. The GER increased by 11.1 percentage points representing an 18% increase while the NER increased by 15.7 percentage points representing a 28% over the same period as shown in Table 8.

Table 8: Gross and Net Enrolment Rates by Education Levels

	2009	2010	2011	2012	2013	2014
ECDE						
GER	62.5%	64.5%	67.0%	69.4%	71.6%	73.6%
NER	56.1%	59.2%	62.4%	65.5%	68.7%	71.8%
Primary						
GER	107.7%	106.8%	106.7%	106.4%	105.0%	103.5%
NER	87.5%	87.9%	88.0%	88.0%	88.1%	88.2%
Secondary						
GER	41.9%	45.7%	47.8%	50.5%	54.3%	58.2%
NER	33.1%	36.0%	38.8%	41.7%	44.5%	47.4%

Source: Ministry of Education, Science and Technology

Figure 5: ECDE Gross and Net Enrolment Rates

As shown in figure 5, the gap between the GER and NER has significantly declined between 2009 and 2014. In 2009, the gap was 6.4 percentage points while in 2014 it was 1.8 percentage points. This indicates that over the period the number of under age and over age children enrolled at ECDE has been declining. Although the GER and NER at national level have shown improvements, there still exist regional disparities. As shown in figure 6, a total of 25 counties recorded GER and NER above the national average while 22 counties recorded rates below the national average.

Figure 6 presents the GER and NER across the 47 counties.

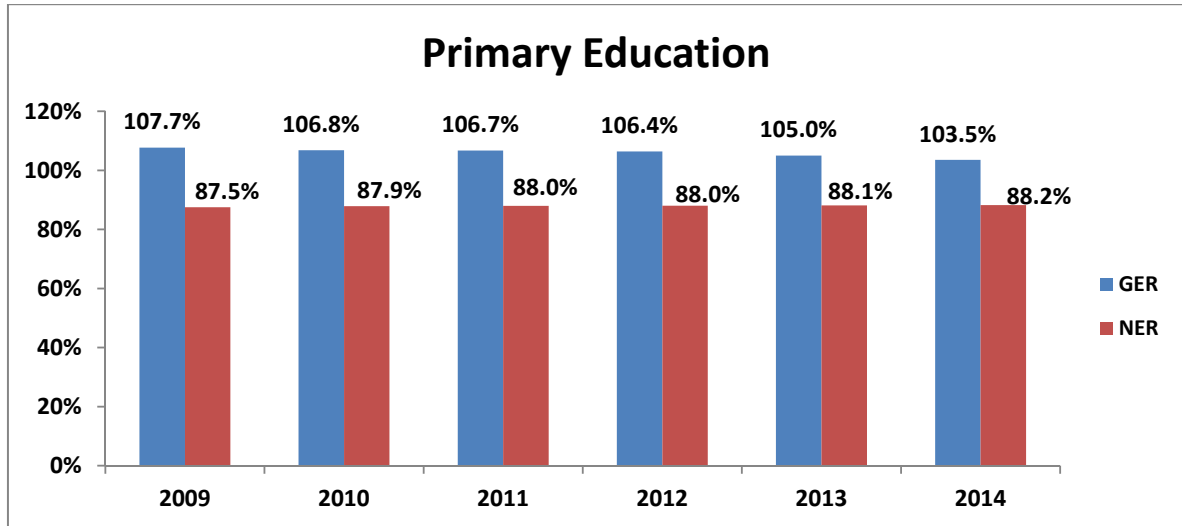

Figure 6: ECDE Gross and Net Enrolment Rates by County, 2014

Primary Education

At the primary level, the GER has consistently registered more than 100% over the period under review. The GER greater than 100% indicates existence of overage and underage children enrolled in primary schools. The GER decreased by 4.2 percentage points between 2009 and 2014 representing a decline of 3.9%. The decrease of GER over the period may be the result of reduction of repeaters and reduction of overage students within primary level.

²Figure 7: Primary Gross and Net Enrolment Rates

As shown in figure 7, the gap between the primary GER and NER has declined between 2009 and 2014. In 2009, the gap was 20.2 percentage points while in 2014 it was 15.3 percentage points. This indicates that over the period the number of under age and over age pupils enrolled at primary has been declining. The decline in GER and increase in NER indicates a positive trend implying that the Government's policies on repetition and promotion have impacted positively on access to education.

In spite of the impressive national figures on GER and NER, there still exist regional disparities as shown in figure 8. A total of 30 counties recorded GER and NER above the national average while 17 counties recorded rates below the national average. Figure 8 presents primary GER and NER across the 47 counties.

² The deviation of GER and NER from earlier reported figures is due to the revised projection of the population.

Figure 8: Primary Gross and Net Enrolment Rates by County, 2014

Secondary Education

At the secondary level there has been an upward trend for the GER and NER having recorded 16.4 and 14.3 percentage points increase respectively between 2009 and 2014. The GER increased from 41.9% in 2009 to 58.2% in 2014 while the NER increased from 33.1% to 47.4% over the same period.

Figure 9: Secondary Gross and Net Enrolment Rates

Regional disparities still exist at the secondary level as depicted in figure 10. A total of 27 counties recorded GER and NER above the national average (58.2% and 47.4% respectively) while 20 counties recorded rates below the national average. It is important to note that at this level of education there is high cross county provision of education. In this case students may be enrolled outside their home counties.

Figure 10: Secondary Gross and Net Enrolment Rates by County, 2014

Internal Efficiency Indicators

Internal efficiency indicators for primary and secondary including promotion rate, repetition rate and dropout rate for the year 2014 are presented in Table 9. The indicators have been developed from 2013 and 2014. The analysis shows that the promotion rate for primary level remains within the range of 90% for classes 1 to 5 and drops to below 90% for classes 6, 7 and 8. Further analysis shows that promotion rate for girls is higher than that of boys across all classes except class 8.

The repetition rates range between 2% and 7.8% with class seven recording the highest while class eight recorded the lowest. Analysis shows that girls posted lower repetition compared to boys across all classes. High dropout rates are observed in the last two classes of the primary cycle with class seven recording 13.6% and class eight recording 23.1%.

Table 9: 2014 Internal Efficiency Indicators for Primary and Secondary Education

	Promotion Rate			Repetition Rate			Dropout Rate		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
Std1	89.8%	92.5%	91.1%	6.1%	5.2%	5.7%	4.1%	2.3%	3.2%
Std2	94.0%	94.7%	94.3%	5.5%	4.7%	5.1%	0.5%	0.6%	0.5%
Std3	94.1%	94.7%	94.4%	5.4%	4.5%	4.9%	0.5%	0.8%	0.7%
Std4	90.6%	93.2%	91.9%	6.0%	5.1%	5.5%	3.5%	1.7%	2.6%
Std5	91.3%	93.5%	92.4%	5.5%	4.9%	5.2%	3.2%	1.7%	2.5%
Std6	88.0%	91.8%	89.9%	5.8%	5.4%	5.6%	6.2%	2.8%	4.5%
Std7	78.7%	78.7%	78.7%	8.1%	7.4%	7.8%	13.2%	14.0%	13.6%
Std8	75.2%	74.8%	75.0%	2.2%	1.8%	2.0%	22.7%	23.5%	23.1%
Form1	97.6%	104.3%	100.7%	0.7%	0.5%	0.6%	1.7%	-4.8%	-1.3%

Form3	88.9%	91.6%	90.1%	2.7%	1.9%	2.3%	8.4%	6.5%	7.5%
Form4	³ N/A	N/A	N/A	4.1%	2.2%	3.2%	N/A	N/A	N/A

Source: Ministry of Education, Science and Technology

At secondary level, promotion rates are relatively high with form one recording the highest and form three the lowest (100.7% and 90.1% respectively). Girls recorded better promotion rates than boys in all the classes. The promotion rates above 100% are attributed to re-entry policy for girls at form one and two.

The repetition rates range between 0.6% and 3.2% with form four recording the highest while form one recorded the lowest. Male students remain more vulnerable to drop out across all classes of secondary schools compared to the female counterparts. ⁴The data shows negative dropout rates for girls in form one and two implying that the number of students re-joining the system having left at some point is greater than the number exiting in 2014.

Pupils/Students Teacher Ratios

The table 10 shows the number of teachers by level and their employer as well as the pupil teacher ratio. At ECDE level, all the 114,831 teachers were employed by county governments and parents. The total number of teachers at primary school level was 317,477. Of these, 76.2% are in public schools while 23.8% are in private schools. Out of all the teachers in public primary schools, 83.3% are employed by the TSC.

³ Promotion rates at form 4 could not be computed for the two years as students flow into a different cycle

⁴ Dropout rates can be computed accurately at the national level. Dropout rate is computed as 1- (Promotion Rate + Repetition Rate)

The Pupil Teacher Ratio (PTR) for public schools based on TSC teachers stands at 41.5 which compares well with the international norm (40). Considering the teachers employed by the Board of Management (BOM), the PTR at public schools drops to 34.5. Figure 11 and 12 show the PTR across counties and depicts the existence of regional disparities in distribution of teachers. 27 counties lie below the national average while 20 lie above the national average.

Table 10: Teachers and Pupil Teacher Ratios, 2014

	Public			Private	Total		
	TSC	BoM	Sub Total	Sub Total	TSC	BoM/Priv	Grand Total
Teachers							
ECDE	N/A	62,114	62,114	26,074	N/A	62,114	88,188
Primary	201,622	40,449	242,071	75,406	201,622	115,855	317,477
Secondary	72,194	35,524	107,718	10,890	72,194	46,414	118,608
PTR							
ECDE	⁵ N/A	31.1	31.1	19.6	N/A	27.7	27.7
Primary	41.5	N/A	34.5	15.8	41.5	N/A	31.3
Secondary	29.8	N/A	20.0	14.3	29.8	N/A	19.5

A total of 118,608 teachers were recorded at the secondary school level. Of this total, 90.8% were recorded in public schools while 9.2% in private schools. Out of all the teachers in public secondary schools, 33% are employed by BoM.

The Pupil Teacher Ratio (PTR) at secondary level stood at 19.5. The public schools PTR was 5.7 points higher than private schools. At this level it is important to note that teacher deployment in public schools is made on the account of Curriculum Based Establishment (CBE). There still exist regional disparities in the distribution of the teachers.

⁵ There are no ECDE teachers employed by the TSC

Figure 11: Public Primary Pupil Teacher Ratio, 2014

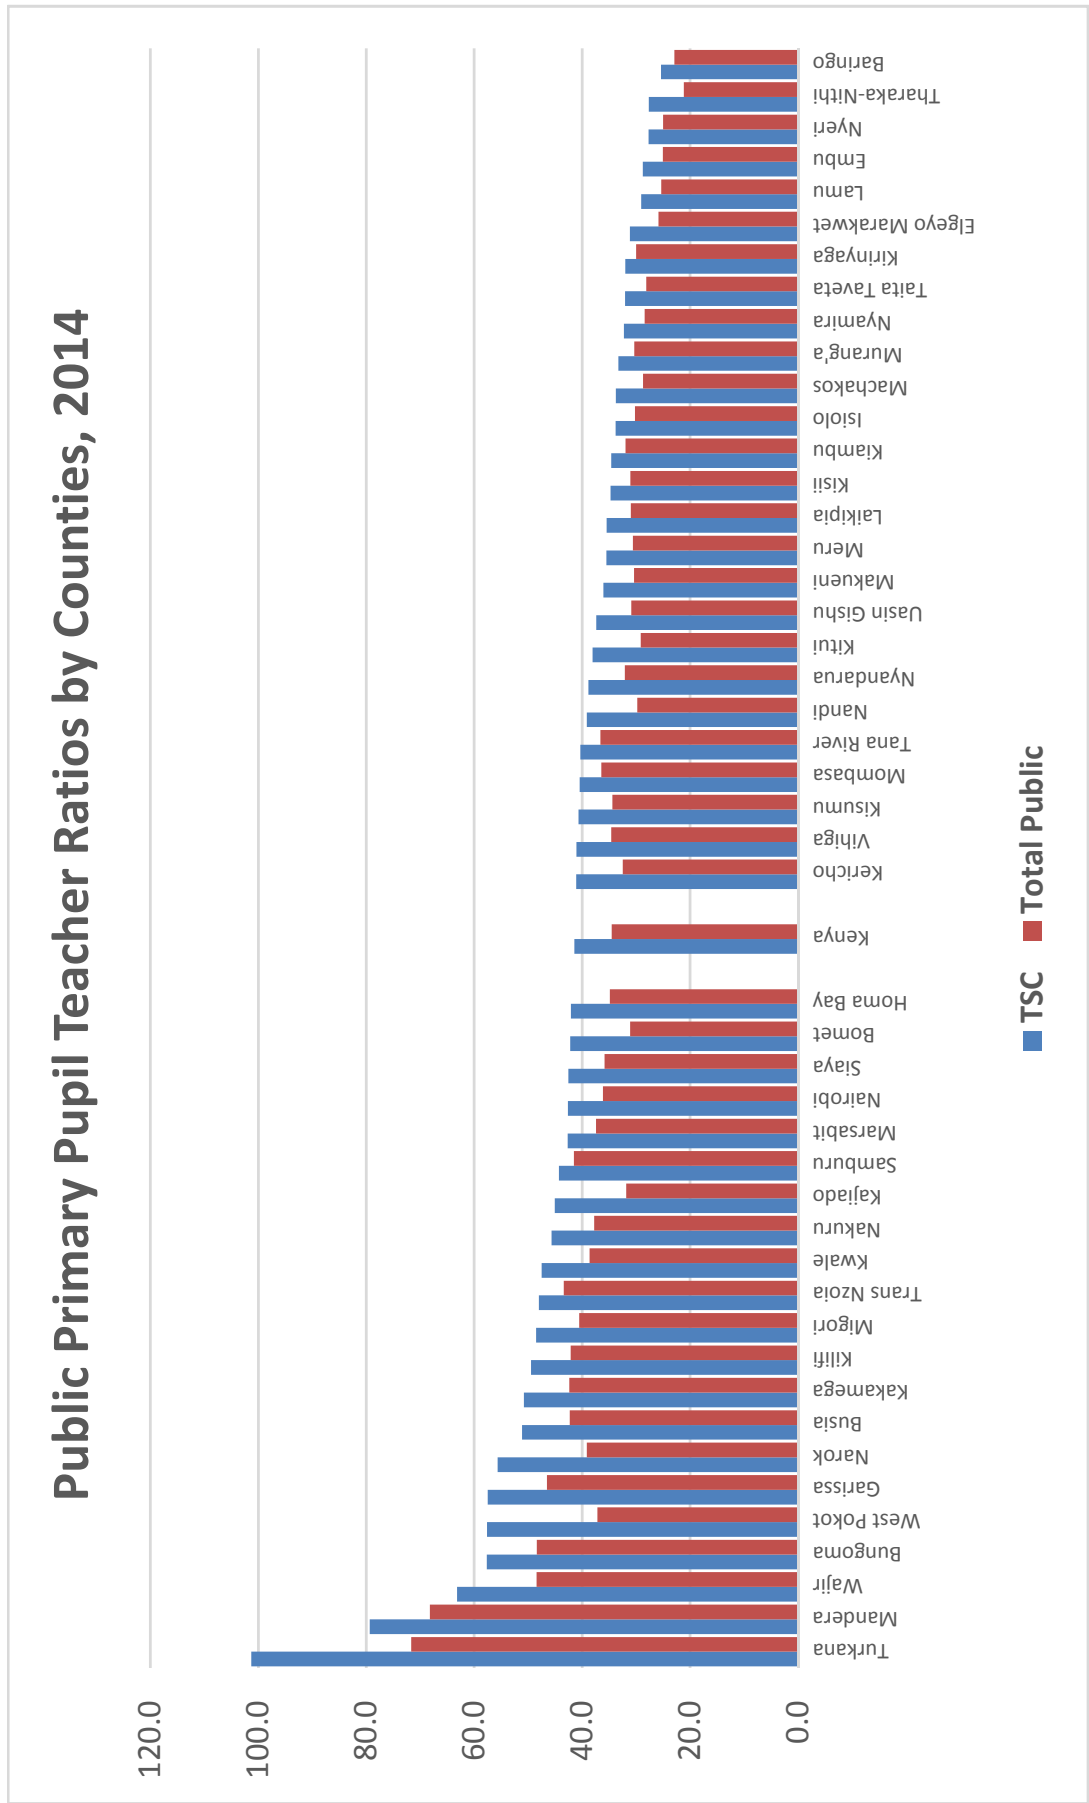

Figure 12: Public Secondary Pupil Teacher Ratio, 2014

Schools Infrastructure

Classrooms and Average Class Sizes

Table 11 presents the status of classrooms in primary and secondary schools. The total number of classrooms in primary schools recoded in 2014 was 304,147 with 230,377 being in public primary schools. Out of the classrooms in public primary schools 80.8% are permanent whereas 68% of classrooms in private schools are permanent. The average class size in public primary schools was 36 while in private schools it stood at 16.

Table 11: Status of Classrooms, 2014

	Permanent Classrooms in Use	Temporary Classrooms in Use	Total Classrooms in Use	Average Class Size
Primary				
Public	186,259	44,118	230,377	36
Private	50,130	23,640	73,770	16
Total	236,389	67,758	304,147	26
Secondary				
Public	49,104	5,245	55,551	40
Private	5,544	1,130	6,773	23
Total	54,648	6,375	62,324	31

Source: Ministry of Education, Science and Technology

At secondary level, there were a total of 62,324 classrooms available for learning. A large share of these classrooms (89.1%) was in public schools. In public secondary schools 88.4% of the classrooms were permanent while permanent classrooms in private schools accounted for 81.9%. The class size in public and private secondary schools was 40 and 23 respectively.

Pupils/Students Toilet Ratios

As presented in Table 12 the Pupil Toilet Ratio (PToR) in public primary schools was 34:1 and 29:1 for boys and girls respectively and compare favorably with the national norm. In public secondary schools, the ratio was 22:1 for male and 18:1 for female.

Table 12: Pupil/Student Toilets, 2014

	Number of Toilets		PToR	
	Male	Female	Male	Female
Primary				
Public	123,996	142,663	34	29
Private	30,673	33,597	20	17
Secondary				
Public	51,041	57,256	22	18
Private	4,883	7,256	15	11

Schools Access to Electricity

Integrating ICT in education as well as making schools learner friendly, the Ministry has made tremendous efforts in connecting schools to power in collaboration with the Rural Electrification Authority (REA). The Ministry has also collaborated with the state department responsible of water and partners implementing school water and sanitation programs to increase the coverage of schools connected to water.

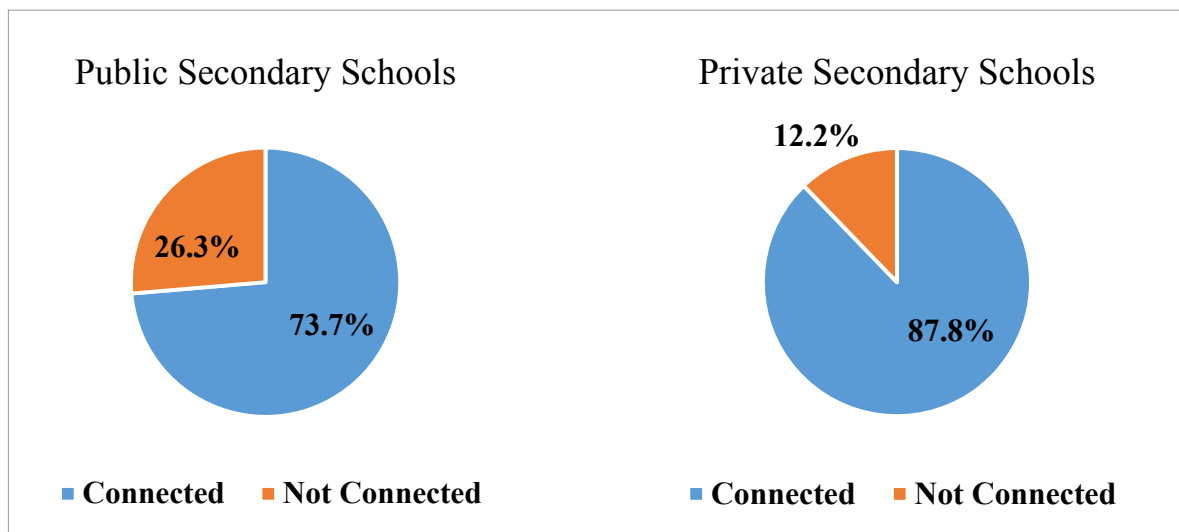

Data from the 2014 school census indicate that 43.8% of all primary schools are connected to electricity while 56.2% are not connected. Figure 13 shows that in public primary schools, 39.4% are connected to electricity while in private primary schools, 57.4% are connected.

Figure 13: Primary School Connectivity to Electricity, 2014

At secondary school level, 75.3% of all secondary schools are connected to electricity while 24.7% are not connected. Figure 14 shows that 73.7% of all public secondary schools are connected to electricity while 87.8% of private secondary schools are connected.

Figure 14: Secondary School connectivity to Electricity, 2014

Schools Access to Water

Figure 15 shows access to different water sources in public and private primary schools. Overall 92% of all primary schools have access to a source of water. Tap and borehole recorded the largest share (51.8%), followed by rain water (22.2%) and then river water at 17.8%. The share of schools with no access to water was larger in public schools (9.5%) compared to 4.1% in private schools.

Figure 15: Primary Schools Access to Water, 2014

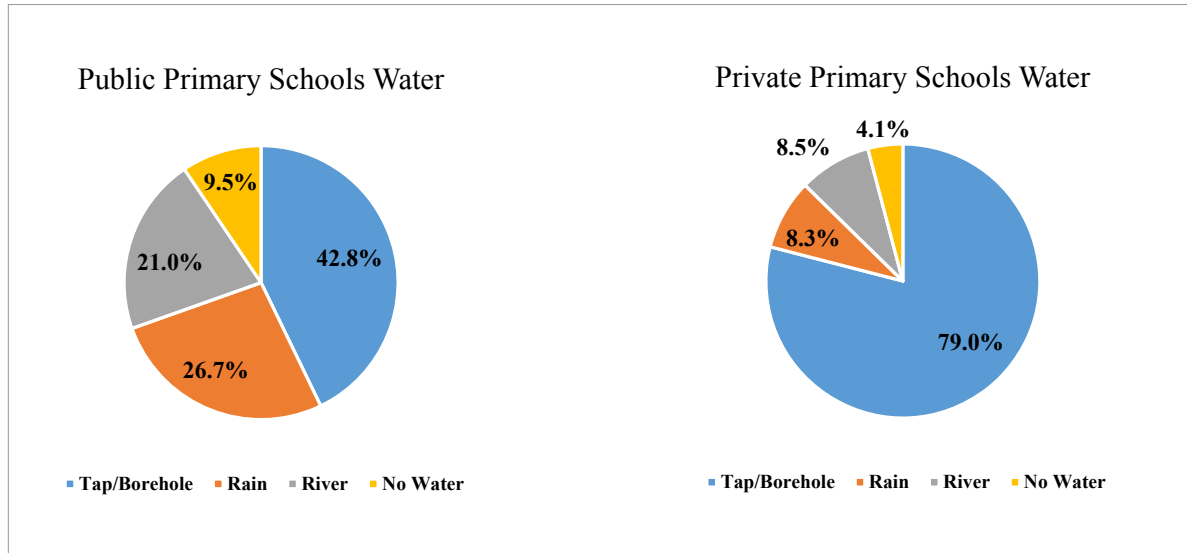

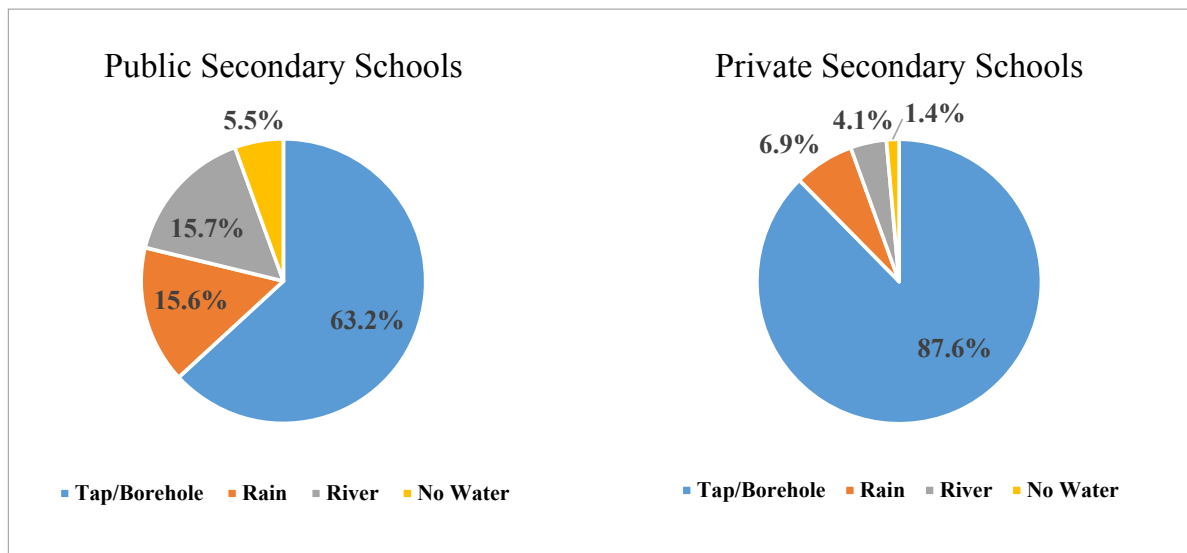

Figure 16 shows access to different water sources in public and private secondary schools. At least 94.4% of all secondary schools have access to water source. 66% of all schools have access to tap or borehole water; 14.6% harvest their water from rain while 14.4% rely on rivers for their water.

Figure 16: Secondary Schools Access to Water, 2014

National Examinations Results

Table 13 highlights the KCPE examination candidature for the period between 2009 and 2014. The total KCPE candidature grew from 727,100 in 2009 to 880,486 representing an annual growth rate of 3.9%. The data reveals that the candidature of girls has been growing faster with an annual growth rate of 4.8% compared to that of boys at 3.0%. Figure 17 shows that the proportion of girls' candidature relative to that of boys has been on an increasing trend over the period under review.

Table 13: KCPE Examination Candidature

Gender	2009	2010	2011	2012	2013	2014
Boys	381,600	388,221	400,814	415,620	426,369	443,258
Girls	345,500	357,859	375,400	396,310	413,390	437,228
Total	727,100	746,080	776,214	811,930	839,759	880,486

Source: Kenya National Examination Council

Figure 17: KCPE Candidature Proportions

As shown in Table 14, the KCPE mean subjects score remained slightly above 50% in the last 5 years. The mean score per subject over the period has been over 50% except for English language, English composition and Kiswahili lugha. Further analysis reveals that Religious education has remained the best performing subject while English composition performed dismally over the period.

Table 14: KCPE Examination Results by subject

Subject	2010	2011	2012	2013	2014
English Language	49.12	47.10	48.16	53.06	47.64
English Composition	42.7	42.45	42.43	41.90	41.47

Mean Subject Score	54.32	53.02	55.95	54.13	54.30

Source: Ministry of Education, Science and Technology

Over the last five years, the KCSE candidature has increased from 354,341 in 2010 to 482,133 in 2014 representing a growth of 8%. The number of male candidates increased from 196,208 to 258,896 while females increased from 158,133 to 223,237. The number of candidates scoring C+ and above increased from 97,134 to 149,717 representing 27.4% and 31.1% respectively over the same period. This represents 11.4% improvement in the qualification for university entry. The proportion of female candidates scoring C+ and above improved from 38% to 41% relative to their male counterparts over the same period. Table 15 below shows the KCSE results for the period 2010 to 2014.

Table 15: KCSE Examination Results

KCSE Grade	Male					Female				
	2010	2011	2012	2013	2014	2010	2011	2012	2013	2014

Source: Kenya National Examinations Council

About 70% of the candidates have consistently scored between C to D- which qualifies them for admission to middle level colleges. However, about 2% of candidates have been scoring E over the period.

CHAPTER FOUR: CONCLUSION AND RECOMMENDATIONS

Conclusion

The 2014 schools census results presented in chapter three gives a picture of the system at the ECDE, Primary and Secondary levels of education. The sector having faced a number of challenges in addressing its, data issues, this seen as a great breakthrough. There is a lot that remains to be done in assuring the delivery of future statistics but these results must be appreciated. The results from the census were faced with non-response with the stand-alone ECDE centers leading in the non-response. The response for primary and secondary schools was 96.5%.

Arising from the analysis presented in chapter three, the sector has recorded significant growth over the years. The number of schools at ECDE, Primary and Secondary levels increased by 16.9 percent between 2009 and 2014 with an average annual increment of 3.2%. Of the three levels, secondary schools recorded the highest annual growth of 8.2% followed by primary at 5.1% and then ECDE at 1.0%. Generally, the demand for education has increased over the years. The relative demand is highest at secondary level of education and is attributed to the ripple effects from FPE and FDSE.

Despite the the growth at public primary due to FPE, the sector recorded a very high growth in the number of private primary schools (76.9%) during this period. The increased investment in private primary school was in response to the pressure created in public primary schools by Free Primary Education programme. Similarly, there was notable increase in the number of private Primary Teachers Training Colleges to address the increased demand for trained teachers by the growing private schools.

The average size of secondary schools increased from 250 in 2009 to 283 in 2011 before decreasing to 264 in 2014. This trend could be attributed to a growing demand in the first phase which could have triggered increased investment in secondary schools infrastructure leading to increased supply of schools in the second phase.

On gender parity, the sector recorded an improvement across the three levels. However cross county disparities remain evident with arid and semi-arid counties recording the highest levels. According to the 2009 population census, 3.5% of the total population lived with disabilities. From the 2014 schools census, 2.6% of all learners in primary school had special needs implying that about 1% of primary school going age children with special needs were not in school. This situation is much worse at secondary school level of education with about 3.4% of those with special needs at this level being out of school.

The number of overage and underage learners at all the three levels has significantly reduced. This is evidenced by the closing in of the gap between the GER and NER during the period. The phenomenon is further supported by the improved Gross Intake Rate at class one which is attributed to enforcement of entry policy at the three levels of education.

On teacher pupil ratio, results from the census indicate that there is no teacher shortage in the three levels. The ratio of government employed teachers to enrolled pupils/students is within an acceptable range considering the sector norm. This notwithstanding, there are serious cross county disparities ranging from very high PTR of 101.3 in Turkana to a low of 25.4 in Baringo. At secondary school level, the highest PTR is 41.9 in Migori while the lowest is 17.5 in Samburu.

Recommendations

The sector has covered enormous ground in data management over the last couple of months. The sector commits to build a culture of periodic reporting on education by implementing the following key recommendations:

Develop an EMIS policy

The Ministry will put in place a framework for management of education statistics. The policy will ensure that education in the sector has a systematic way of production. Standards will be prescribed so that credibility of data is assured. Having a living system, transitions will be made as smooth as possible from one census to the next. The policy will facilitate annual data collection and reporting.

Increase the scope of reporting

In 2014, the Ministry focused on the first three levels of education i.e. ECDE, Primary and Secondary. This, as mentioned earlier was informed by the limited time for the 2014 process. Going forward, the Ministry will increase the scope of production of education statistics to span ECDE all the way to the TVET level in 2015. In addition, the Ministry will lay necessary framework for reporting by universities. In addition to this booklet, the ministry will publish schools report cards as feedback to the data that was submitted to schools. The report cards will also be used as an accountability mechanism.

Strengthen partnerships with the KNBS

The Kenya National Bureau of Statistics is responsible for the National Statistical System and its contribution to the harnessing of credible statistics in the sector is very critical. As the Ministry looks forward to processing of statistics at devolved levels, there is need to strengthen the collaboration that the Ministry and the KNBS have. This will ensure that the County Statistics officers can offer their services to the County Director of Education in the processing of statistics.

Improve ECDE Data

According to the Constitution of Kenya 2010, the delivery of ECDE is a devolved function. However, policy formulation and standards setting remains a function of the National Government. To ensure viable policies are developed, quality data has to be made use of. In this regard, the Ministry will work closely with county Governments to ensure that the stand alone ECDE centers are brought into the reporting framework.

Carry out an Education Sector Analysis

The last time a comprehensive education sector analysis was carried out in the country is over two decades ago. Having collected comprehensive data in 2014, the Ministry will make use of the results of the schools census as well as further qualitative study to carry out a sector analysis. This is expected to establish the strengths and the weaknesses of the sector as well as to examine the investments undertaken by the Ministry whether they are viable or not; whether they are efficient or not. The sector analysis will also evaluate the internal efficiency of the education system.

Use of School Unique Codes

One of the steps taken towards delivery of 2014 schools census results was the validation of schools list and subsequent development of a unique code. The Ministry will make the code an official identifier. Each and every existing school will be notified of their number to be used in all official reporting. Schools under registration will have new codes generated and supplied to them upon registration.

Strengthen Partnerships

The Ministry would like to thank its development partners for the incredible work they did in coming together and choosing to deliver as one family. The Ministry will continue to strengthen this approach and facilitate the establishment of necessary frameworks to sustain the same. The Ministry recommends that its partners make use of this booklet to inform their programming in various areas of interest.

ANNEXES

ANNEX I: DEFINITION OF INDICATORS

This section gives results from the 2014 schools census as they were responded to by schools. The results are aggregated at county administration level. This chapter has made no adjustment to the raw data collected in the census. For indicators that are computed as composite of more than one measure, definitions of such indicators are provided below.

Access:	The total number of new entrants in a given grade of an education cycle, regardless of age, expressed as a percentage of the official theoretical age expected to be in that grade.
Gross Intake Rate:	The total number of new entrants in the first grade of a cycle of education, regardless of age, expressed as a percentage of the official theoretical school-entrance age.
Gross Enrolment Rate:	Total enrolment in a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school year.
Net Enrolment Rate:	Enrolment of the official age group for a given level of education expressed as a percentage of the corresponding population.
Gender Parity Index:	Ratio of female to male values of a given indicator.
Promotion Rate:	Proportion of pupils from a cohort enrolled in a given grade at a given school year who study in the next grade in the following school year.
Repetition Rate:	Proportion of pupils from a cohort enrolled in a given grade at a given school year who study in the same grade in the following school year.
Drop Out Rate:	Proportion of pupils from a cohort enrolled in a given grade at a given school year who are no longer enrolled in the following school year.
Completion Rate:	The number of new entrants (enrolment minus repeaters) in the last grade of an education cycle regardless of age, divided by the population expected to be in that grade.
Transition Rate:	The number of pupils (or students) admitted to the first grade of a higher level of education in a given year, expressed as a percentage of the number of pupils (or students) enrolled in the final grade of the lower level of education in the previous year.
Pupil Teacher Ratio:	Average number of pupils (students) per teacher at a specific level of education in a given school year.
Out of Schools Children:	Children in the official primary school age range who are not enrolled in either primary or secondary schools.
Pupil Textbook Ratio:	Average number of pupils (students) per text book at a specific level of education in a given school year.
Pupil Toilet Ratio:	Average number of pupils (students) per toilet at a specific level of education in a given school year.

ANNEX II: EARLY CHILDHOOD DEVELOPMENT AND EDUCATION

ANNEX V: WORKING GROUPS

This booklet has been compiled by the members of a technical working team which included:

Steering Team

Dr. Belio R. Kipsang⁷ Principal Secretary State Department of Education

Isaac G. Kamande, Director Projects and Programs, Ministry of Devolution and Planning

Daniel Baheta, Chief of Education UNICEF Kenya Office

Technical Working Team

Agnes Koori, Deputy Chief Economist, State Department of Education

Samuel Nthenge, Deputy Chief Economist, State Department of Education

Evelyn Anupi, Principal Economist, State Department of Education

Mutetei Kavali, Senior Economist, State Department of Education

Polycarp O. Otieno, Statistician, State Department of Education

Principal Consultant-UNICEF

Ramahatra Andriamamy Rakotomalala, United Nations Children's Fund

MINISTRY OF EDUCATION
SCIENCE AND TECHNOLOGY
