The new 2019 Photoshop CC comes with more features than ever before, including new Smart Filters, like the new Pro-Grade Boosted and Pro-Grade Stripe filters; comprehensive Select and Erase tools; new Adobe Sensei facial-recognition features; and an ever-expanding assortment of tools and powers. The new Adobe Photoshop features with the Quick Edit Panel include a Double Tab tool to assist with cropping your images, perfect for clipping an object of choice out of your image. You can select Multiple Overlay Layers, which allows you to create and rename a selection with one click, then merge it with any other layer — even ones that are not selected. You can also use the Shapes Tool to create or select a custom shape such as a Crop, a path, or an oval, and more. The new Photoshop CC 2019 also includes many updates to the Brush tools and features, which focus on speed, precision, and accuracy when it comes to painting with one of the finest paintbrushes on the market. Brush features in Photoshop include a new Content Aware Fill tool, which can spot areas of an image that need more or less detail based on the foreground content. Thin Layers is also a new option for blemishes that can do amazing things; it removes or reduces the visibility of small imperfections and makes overpainting fast and easy. In the new features, the Freeze option for Select Tool polygonal features makes it snap to the exact position on an image even if you move the shape in the Layers panel, making it easy to select and edit shapes. And the ability to Create, Modify, or Duplicate objects that you already have selected, makes it possible to capture that subject into new layers, and even copy and paste multiple objects in original and duplicated ways.
